Immediately beneath the cliff there

CHAPTER IX.

"Who Could Have Foreseen It?" DREADFUL thing has happened to us. Who could have fore- for a signpost." seen it? I cannot foresee any end to our troubles. It may be that we are condemned to spend our whole lives in this strange, inaccessible place. I am still so confused that I can hardly think clearly of the facts of the present or of the chances

of the future. To my astounded senses the one seems most terrible and the

other as black as night.

When I finished my last letter I stated that we were within seven miles from an enormous line of ruddy cliffs which encircled, beyond all doubt, the plateau of which Professor Challenger spoke. Their height, as we approached them, seemed to me in some places to be greater than he had stated, running up in parts to at least a thousand feet, and they were curiously striated in a manner which is, I believe, characteristic of basaltic upheavals. Something of the sort is to be seen in Salisbury crags, at Edinburgh. The summit showed every sign of a luxuriant vegetation, with bushes near the edge

that we could see. That night we pitched our camp immediately under the cliff-a most wild and desolate spot. The crags above us were not merely perpendicular, but curved outward at the top, so that ascent was out of the question.

and farther back many high trees.

There was no indication of any life

In the morning, after a frugal breakfast of coffee and manior-we had to be economical of our stores-we held a to the tree in such a way as to point council of war as to the best method to the westward. of ascending to the plateau above us.

Challenger presided with a solemnity as if he were the lord chief justice on self upon a dangerous errand, our plothe bench. Picture him seated upon a neer has left this sign so that any rock, his absurd boyish straw hat tilted on the back of his head, his supercilious eyes dominating us from under shall come upon some other indicahis drooping lids, his great black beard tions as we proceed." wagging as he slowly defined our present situation and our future move-

"I need not say," said our leader, "that on the occasion of my last visit | bamboo, like that which we had trav-I exhausted every means of climbing ersed in our journey. Many of these the cliff, and where I failed I do not think any one else is likely to succeed, I am something of a mountaineer. I had none of the appliances of a rock climber with me, but I have taken the precaution to bring them new. With their aid I am positive I could climb that detached pinnacle to the summit. But so long as the main cliff overhangs it is vain to attempt ascending that. I was hurried upon my last visit by the approach of the rainy season and by the exhaustion of my supplies. These considerations limited my time, and I can only claim that I have surveyed about six miles of the chir to old tragedy. Only a few shreds of the east of us, finding no possible way What, then, shall we now do?"

"There seems to be only one reasonable course," said Professor Summer- that the dead man was a European. A lee. "If you have explored the east we should travel along the base of the cliff to the west and seek for a practicable point for our ascent."

"That's it," said Lord John, "The odds are that this plateau is of great size, and we shall travel round it until we either find an easy way up it or come back to the point from which

The ground at the foot of the cliff was rocky and broken, so that the going was slow and difficult. Suddenly a fast growing plant, but it is surely we came, however, upon something which cheered our hearts. It was the site of an old encampment, with several empty Chicago meat tins, a bottle labeled "Brandy," a broken tin opener and a quantity of other travelers' debris. A crumpled, disintegrated newspaper revealed itself as the Chicago Democrat, though the date had been | particular inquiries about Maple White.

"Not mine," said Challenger. "It must be Maple White's."

Challenger. "He had some presentiment that worthy footsteps would follow close behind him." "He had chalk, then?"

"Maple White again," said Professor

"A box of colored chalks was among the effects I found in his knapsack. I remember that the white one was worn to a stump "

"That is certainly good evidence," said Summerlee. "We can only accept his guidance and follow on to the

the ground.

It was a solemn place, for the walls were so gigantic and the slit of blue sky so narrow and so obscured by a double fringe of verdure that only a dim and shadowy light penetrated to the bottom. We had had no food for many hours and were very weary with the stony and irregular journey, but our nerves were too strung to allow us to halt. We ordered the camp to be pitched, however, and, leaving the Indians to arrange it, we four, with the two half breeds, proceeded up the

It was not over forty feet across at the mouth, but it rapidly closed until it ended in an acute angle, too straight and smooth for an ascent. Certainly it was not this which our pioneer had attempted to indicate. We made our way back-the whole gorge was not more than a quarter of a mile deep-and then suddenly the quick eyes of Lord John fell upon what we were seeking. High up above our heads amid the dark shadows there was one circle of deeper gloom. Surely it could only be the opening of a

The base of the cliff was heaped with loose stones at the spot, and it was not difficult to clamber up. When we reached it all doubt was removed. Not only was it an opening into the rock, but on the side of it there was marked once again the sign of the ar-

We had proceeded some five more miles when again we saw a white arrow upon the rocks. It was at a point where the face of the cliff was for the first time split into a narrow cleft. Inside the cleft was a second guidance mark, which pointed right up it with the tip somewhat elevated, as if the spot indicated were above the level of

narrow gorge.

"Most certainly a signpost," said

gle file we followed at his heels. The cave had evidently been water

worn, the sides being smooth and the floor covered with rounded stones. It was of such a size that a single man could just fit through by stooping. For fifty yards it ran almost straight into the rock, and then it ascended at an angle of forty-five. Presently this incline became even steeper, and we found ourselves climbing upon hands slid from beneath us. Suddenly an ex-

"It's blocked!" said he. basalt which extended to the ceiling. "The roof has fallen in."

In vain we dragged out some of the pleces. The only effect was that the larger ones became detached and threatened to roll down the gradient and crush us. It was evident that the obstacle was far beyond any efforts

## By Midnight Tuesday, August 15th

Up to midnight August 15, a period of 7½ months, we sold and delivered more United States Automobile Tires than we sold during the entire twelve months of 1915—last year.

By August 16, we had passed, by several thousand casings, the sales total for 1915,—itself a year of steady sales increases.

And day by day these phenomenal 1916 increases are heaping up.

Besides—there were still left of this year 115 selling days—41/2 months.

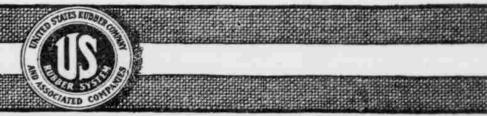

This almost unbelievable feat of equalling, in 7½ months, the sales record of last year, proves the unequalled merit and actual economy of
